**Morrison Supply Drinking Water Suitability -- \$52.00**

Nitrate-nitrogen, sulfate-sulfur, calcium, magnesium, sodium, iron, manganese, fluoride, total dissolved solids, total hardness, electrical conductivity, water pH, water quality ratings and interpretations.

### COLLECTING SAMPLES FOR DRINKING WATER ANALYSES

#### *How to take a water sample*

1. **For all analyses**, wash hands with soap and water before collecting sample. Let cold tap run at full force for at least 3 to 5 minutes to clear the line.
2. Fill the non-sterile container to the top.
3. Tighten the lid securely on all bottles to prevent them from opening during shipment.
4. Place the containers in the shipping box.
5. Complete the information on this sheet, and place this sheet in the shipping box. Close, seal, and mail the box promptly.
